Our third Curriculum Day for 2014, to be held on Wednesday 6th August, will involve all staff participating in workshops, for the morning sessions, related to the School Review process which we are required to undertake during Terms 3 and 4 this year.

The afternoon sessions will include a range of professional development for all staff including asthma management, Abilities Based Learning and Education Support program implementation, online training modules and assessment and reporting system training.

Dear Parents and Carers,

2014 is the year of our School Review. This review, conducted every four years for all government schools, involves the evaluation of our school progress against the goals and targets of our 2010 to 2013 Strategic Plan. It provides an opportunity for the whole school community to reflect on the school's achievements and to identify future focus areas for school improvement.

All parents and carers will be given opportunity to participate in this process through a survey which will be distributed to families shortly.

At our Curriculum Day on Wednesday 6th August all staff will participate in workshops to evaluate school progress from 2010 – 2013, by analysing school and student learning data and auditing the strategies implemented to determine our success.

The evaluation process will lead to the development of a School Self-Evaluation document which will be the focus of our Review. School Council will be involved in the self-evaluation process at School Council Meetings and will be required to endorse the Self-Evaluation document prior to it being sent to our appointed School Reviewer.

The independent School Reviewer, Jan Lovett, will consider all our data and self-evaluation documentation and will then facilitate a meeting with the school team, including the school council president and two peer reviewers (principals from other schools) on the 18th November.

Jan will then prepare a review report for the Department of Education and the school community. The outcomes of our Self-evaluation and Review will inform the development of our new four year Strategic Plan for school improvement.
